

Scrofula

THE OFFSPRING OF HEREDITARY BLOOD TAIN.

Scrofula is but a modified form of Blood Poison and Consumption. The parent who is tainted by either will see in the child the same disease manifesting itself in the form of swollen glands of the neck and throat, catarrh, weak eyes, offensive sores and abscesses and of tentacles white swelling—sure signs of Scrofula. There may be no external signs at all, but the disease develops slowly in some cases, but the poison is in the blood and will break out at the first favorable opportunity. S. S. S. cures this wasting, destructive disease by first purifying and building up the blood and stimulating and invigorating the whole system.

J. M. Seals, 115 Public Square, Nashville, Tenn., says: "Ten years ago my daughter fell and cut her forehead. From this wound the glands on the side of her face became swollen and burst. Some of the best doctors here and elsewhere attended her without any benefit. We decided to try S. S. S. and a few bottles cured her entirely."

SSS makes new and pure blood to nourish and strengthen the body, and is a positive and safe cure for Scrofula. It overcomes all forms of blood poison, whether inherited or acquired, and no remedy so thoroughly and effectively cleanses the blood. If you have any blood trouble, or your child has inherited some blood taint, take S. S. S. and get the blood in good condition and prevent the disease doing further damage.

Send for our free book and write our physicians about your case. We make no charge whatever for medical advice.

THE SWIFT SPECIFIC CO., ATLANTA, GA.

THE COTTON CROP.

H. F. Dutton & Co.'s Sea Island Cotton Report, August 1st, 1901.

Mr. Geo. K. Robinson, of this city, who has been in the cotton business for twenty years or more, has been assisting Messrs. H. F. Dutton & Co., of Gainesville, in preparing the cotton statement for this year, and sends out the following information:

SOUTH CAROLINA.

Reports from South Carolina show the acreage to be fully ten per cent. more than last year, yet other conditions make the general outlook for the state at the present time some ten per cent. short. With all conditions fully equal to last season from now to the harvesting of the crop, we predict the crop will be about the same. Cold nights at the time of planting caused poor stands, and an abundance of rain has caused grass and weeds to get ahead of the planter with his work, which is sure to cause the plant to scald, shed and possibly throw off a large per cent. of its lower fruit. The fruit is from two to three weeks late, as shown by the plant.

GEORGIA.

The conditions of Georgia, we think, are more favorable than those of South Carolina, but at the same time hardly up to last year, owing to about the same causes. While some sections of Georgia show an unusually bright prospect for a large crop, the average for the state will be somewhat off, as shown by reports. The crop is very late, owing to a cold and backward spring over a large portion of the Sea Island cotton territory.

FLORIDA.

We consider Florida has the best prospect for a good crop of the three states, and predict more than an average crop if the season continues a full average one to gathering time. In several districts of Florida there has shown what may prove to be of untold damage to crops in the shape of caterpillar, scald, blight and rust. While there has not been any damage to amount to much up to the present time, the plant is in prime condition to accept of disaster.

We once more feel compelled to call the attention of the farmers to the great necessity, if they expect first-class prices for their cotton this coming season, of taking particular pains in gathering same as to trash, hard and immature bolls, blue and stained locks, to be sure that the cotton does not stay in the field too long after opening, as it turns the lint blue and weakens the staple. There is no question if the planter will be very careful.

Beware of Ointments for Catarrh That Contain Mercury.

as necessary will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces. Such articles should never be used except on prescriptions from reputable physicians, as the damage they will do is ten fold to the good you can possibly derive from them. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, O., contains no mercury, and is taken internally, acting directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure you get the genuine. It is taken internally and made in Toledo, Ohio, by F. J. Cheney & Co. Testimonials free.

Sold by druggists, price 75c. per bottle. Hall's Family Pills are the best.

ful in picking his cotton, to pick the waxy bolls separate which grow on male or he stalks, its value will be greatly enhanced. The best way is to pull them up so he will not be tempted to get quantity regardless of quality. Great care should be taken to marry the cotton to ginneries where they thoroughly understand their business. Slight carelessness on the part of ginners may make two or three cents difference in price. Cotton should be moderately sunned to make a bright, lively sample. This enhances its value and pleases the buyer or manufacturer.

The quantity of fine grade cotton seed planted this season all over the Sea Island belt is much less than usual, because of the small difference in price realized between the high and low grade cottons. On account of the want of care in planting well selected seed there is no question but that there will be a much larger proportion of a regular staple in the coming crop than for years, and the same will continue year after year, until a greater difference in price is made in cotton showing waste and otherwise.

The Sea Island cotton crop as a whole, we consider, never was in as serious a condition to receive a material set back as at the present time. The large proportion of the crop being so backward, drought, rains, shedding, rust, caterpillar or frost would surely cut our estimates to a large percentage less. There is but little prospect of the average amount of cotton being marketed early on account of the lateness of the coming crop, regardless of prices that might be offered. Of course any prediction made at this stage of the crop is largely guess work, but we feel disposed to estimate the crop of 1900 '01 at 95,000 to 100,000 bales, as all our estimates for the last three seasons have fallen short of the final results.

Telegraphic reports from all over the Sea Island cotton belt show as a whole it is favorable to the growing crop on August 1st.

A Raging, Roaring Flood

Washed down a telegraph line which Chas. C. Ellis, of Lisbon, Ia., had to repair. "Standing waist deep in icy water," he writes, "gave me a terrible cold and cough. It grew worse daily. Finally the best doctors in Oakland, Neb., Sioux City and Omaha said I had consumption and could not live. Then I began using Dr. King's New Discovery and was wholly cured by six bottles." Positively guaranteed for coughs, colds and all throat and lung troubles by Anti-Monopoly Drug Store. Price 50c.

GOOD ROADS.

Their Comfort, Luxury and Saving.

It is estimated that the public roads of the United States aggregate 1,500,000 miles in length. The somewhat conservative estimates of Gen. Roy Stone, of the U. S. Department of Agriculture, places the total wagon transportation at approximately 500,000,000 tons. The average distance of haul is placed at eight miles, and the average cost of transporting one ton that distance is assumed to be \$2. This makes the total yearly cost of wagon freighting a round billion of dollars. All this is assuming that the roads of the country are in their present unimproved condition. Should the roads be put in first class condition and brought to something like the state of perfection in which we find them in foreign countries, it is claimed by those who are in a position to know that this same ton of freight could be transported the same distance at a cost of only 50 cents. On this basis the enormous saving of \$900,000,000 a year in wagon transportation would result from perfect highways in every section of the country.

A better idea of the magnitude of this great saving may be drawn from the fact that the total animal value of all farm products is something like \$3,000,000,000, and that the saving above referred to would equal one-fifth or twenty per cent. of that amount. The tax returns of the entire country show that we are spending \$20,000,000 a year for the maintenance of public highways. This means just the keeping of roads open and passable and does not include any permanent improvement. The maintenance and improvement of public highways therefore becomes a serious problem and one which should engage the attention of every thinking individual who is obliged to employ them in the conduct of his business.

A long step in the right direction, because it means permanent improvement, would be the introduction of the modern broad tired wagon wheels. This matter is appreciated in many states to that extent that the farmer who uses such wheels on his wagon has his highway tax greatly reduced in consideration of the fact.

Broad tires do not cut up and rut the highway, but rather firm it, and frequent passing over the same effect as passing a heavy roller over the surface.

To Cure a Cold in One Day

Take Laxative Bromo Quinine Tablets. All druggists refund the money if it fails to cure. E. W. Grove's signature is on each box. 25c.

Teething

Then the baby is nervous, and fretful, and doesn't gain in weight.

Scott's Emulsion is the best food and medicine for teething babies. They gain from the start.

Send for a free sample. SCOTT & BOWNE, Chemists, 100 North Street, New York. Sold in all drug stores.

Florida is All Right.

Mr. John D. Robertson has just returned from a trip down the west coast and is in ecstasies over the substantial progress it is making. Pineapples, oranges and all manner of fruits are being grown, and as a vegetable section it is measuring strength with the east coast fairland.

The interior also is donning its best bib and tucker. Its orange groves are again coming into bearing; the corn yield is the biggest in years and the fattening of cows and hogs promises to become an industry that in time will divide honors with the great West.

It seems that if Florida is not all right she is fast getting so.

The laws of health require that the bowels move once each day and one of the penalties for violating this law is piles. Keep your bowels regular by taking a dose of Chamberlain's Stomach and Liver Tablets when necessary and you will never have that severe punishment inflicted upon you. Price 25 cents. For sale by Anti-Monopoly Drug Store.

Better Than Gold Bearing Government Bonds.

A. S. Campbell, of Bassinger, Fla., has a grapefruit tree that netted him last year \$230. That leads to the remark that a peach tree in Florida is worth more than one, an orange tree, more than two, and a grapefruit tree more than three interest-bearing gold bonds. These trees grow while you sleep.

Would Have Cost Him His Life.

Oscar Bowman, Lebanon, Mo., writes: "I have been using Foley's Kidney Cure and take great pleasure in stating it gave me permanent cure of kidney disease which certainly would have cost me my life." Take none but Foley's. Anti-Monopoly Drug Store.

Andalusia.

There is to be a picnic at Lovers' Lane the 23d of August. There will be an abundance of refreshments on the grounds. Everybody is invited to go and carry with them well filled baskets.

For Whooping Cough.

"Both my children were taken with whooping cough," writes Mrs. E. O. Dutton, of Danville, Ill. A small bottle of Foley's Honey and Tar cured the cough and saved me a doctor's bill. Anti-Monopoly Drug Store.

GENTLEMEN. Get the New Novel Discovery

S. A. STANDLEY

(Successor to Standley, Cranford & Co.)

Our Record

Since entering the Wagon and Harness business, nearly two years ago, we have carried a larger and better stock, made lower prices and given better service than could be had elsewhere in Central Florida. Our hundreds of customers will tell you of our satisfactory dealings, and we desire to thank our trade for their liberal patronage.

Our Intentions.

Having control now of the entire business, I intend to carry a still more complete and varied stock, including not only Buggies, Wagons, Harness and Saddlery, but all the associate and supplemental lines. I have the very best facilities for buying and selling, and will give my entire attention to securing the most satisfactory goods and making the lowest prices. I will at all times be able to sell you better goods at a given price than you can obtain elsewhere.

TO OUR OLD CUSTOMERS: We solicit a continuance of your trade, which we promise to handle with more satisfaction than before; and from those who have never bought of us we ask a chance to do business, feeling that a trial purchase will mean a continuance. To satisfy our customers is our constant aim.

S. A. STANDLEY.

NOTEL COQUINA,

RWOND-BY-THE-SEA,

East Coast of Florida

Hotel Coquina is situated on a bluff directly overlooking the ocean. While it offers all the delights of the sea shore, it is only ten minutes walk, or five minutes by horse car, from the orange groves and palm shaded walks on the banks of the Halifax River. It is two miles from the railroad station, being connected with it by horse-car. Beautiful walks and drives, groves of lemon, orange, and rare tropical fruits, avenues of oleander and palmetto. River, ocean, surf-bathing and fine fishing. The climate is delightful, and is beneficial in cases of overwork or nervous prostration.

Will open about the first of June, but will be in a position to take care of guests after May 20th. Summer rates: \$2 per day; \$8 to \$12 per week. 524 For further information address, D. B. MATHESON, Ormond, Fla.
